Summary

I am a Web Developer with a background in music and food service pursuing a career beginning with a job as a Junior Web Developer.

Projects

Team Profile Generator | UNH Coding Bootcamp

Sole Author

- This is a command line application that takes the user's input about their team members and automatically generates a stylized profile in the form of an HTML document.
- Aside from the automatically generated HTML document, this application is built entirely with JavaScript. It uses the Inquirer package to ask questions, and Jest to run the tests.

Weather Dashboard | UNH Coding Bootcamp

Sole Author

- This is an application with which the user can search any city in the United States and view that city's current weather and a forecast for the next five days.
- This is an entirely front-end application that uses Bootstrap for styling, and all its functionality is built with Javascript. It uses two third-party APIs from OpenWeatherMap to obtain the weather data.

Professional Experience

Dunkin'

July 2020 - Current

Crew Member

Stratham, NH

- Strategically managed time to maintain store and deliver service to customers within strict time limits
